Indicem systematicum

addidit

F. C. Kielsen.

quondam in schola metropolitana magister primarius.

Hafniae 1835.

Sumptibus *Christiani Steen*, bibliopolae et chartopratis hafniensis:
typis *Bianco Luno & Schneider*.

Quoad *Piscium* ordines celeberrimum *Blumenbach*; quoad vero genera speciesque immortalem *Linnaeum* (editionem XIII^{am} ejus Systematis Naturae comparata) sumus secuti. Species, parenthesi inclusae, in Systemate Linn. desiderantur; quare eas servavimus, quibus usus est auctor in textu danico, aeneas hujus operis tabulas illustraturo. Has etiam adjecimus, ubi differunt a Linnaeanis.

In hoc indice *Branchiostegum coecum* Blumenb. (*Myxine glutinosam* Linn.) quidem commemoravimus; sed tabula citata pertinet ad volumen operis hujus, quod vermes complectitur, inter quos Linnaeus posuerat.

Classis IV. *Pisces.*

Ordo I. *Chondropterygii.*
